

Proper Container Placement is the Key to Automated Service

- Have the container at the curb the night before pickup or by 7:00 a.m. of your collection day.
- Place the container at least five feet from any object, like a tree, pole, fire hydrant, mailbox, electrical box, cable box, etc., and a least five feet away from cars so the automated arm can reach your container.
- Please have this same distance of five feet between waste and recycling containers.
- Don't lean anything against the container.
- Don't place your container under a tree.
- Place container one foot from the curb or edge of the street.
- Remember to place the arrows on the lid of the container toward the street and the handle toward your house, with the lid closed.
- Please don't allow children to play in or around the containers. LMR Disposals' trucks use mechanical arms to pick up the waste and recycling containers.
