The District will periodically be inspecting your site for compliance with the certified plan. You only need to call for a Report of Compliance inspection (final inspection) at the completion of your project. The District evaluates all projects on an ongoing basis to determine if the District's costs for review and inspection have exceeded the original fee. The owner/applicant will be notified immediately when additional fees are assessed as they relate to the additional services required by District staff to bring the project to completion. Additional fees assessed will be based on uncompleted portion(s) of the project.
