Smart Phones, Cell Phones, Tablets (Consider Donating if working)

Most cell phone manufacturers, retailers, and service providers have ongoing programs where you can drop off or mail in your used wireless device.

Before recycling your device:

- Cancel your service.
- Erase all the phone's memory, contacts, and stored information.
- Follow instructions from your wireless provider on how to conduct a factory reset.
- Remove your SIM card and cut in half or shred.
- Never throw out in trash or place in regular recycling

Mulch & Wood

- West Jersey Mulch (908) 783.4000

Paint

Oil-based paints are considered Hazardous Household Waste (HHW) and are illegal to throw out in trash or recycling. Paints of this type are toxic, flammable, and contain harmful chemicals; older cans (1978 and before) may contain lead. For these reasons, oil-based paints must be taken to Hunterdon Hazardous Waste collection events.

- Latex paint (water-based) manufactured before 1990 may contain mercury and many current exterior latex paints still do. Because of this and other environmental reasons, latex paints must not be disposed of in liquid form. Latex paint can be disposed of as trash if it has been dried out. To dry small amounts of latex paint, find a safe area away from pets and kids, remove the lid and let the paint dry in the can. You may need to leave the lids off to show your trash collector that the can is safe for collection. If you have a larger amount of latex paint, mix with kitty litter or shredded newspaper to help paint dry faster. Never pour latex paint into storm drains, onto the ground, or into streams or rivers. Never place liquid latex paint, oil-based paint, or stains in trash.

Medications

- Hunterdon County Sheriff's Office: Phone: 908-788-1166

Refrigerators, Air Conditioners & Dehumidifiers (Consider Donating if working)

Refrigerators, air conditioners, and dehumidifiers need a Freon "certificate of evacuation" before recycling. Check the phone book or the Internet for more information on Freon removal. Improperly released Freon rises into the stratosphere and is broken down by strong ultraviolet (UV) light, which then releases chlorine atoms that deplete the ozone layer.

Contact your appliance repair person, retailer, or manufacturer for proper removal of Freon.

Tires

Regularly checking tire pressure and rotating tires will greatly reduce tire wear and maximize your cars gas mileage. Caring for your tires will extend tire life, reduce your carbon footprint, extend gas mileage, and delay the purchase of costly new tires!

Visit the State of New Jersey Department of Environmental Protection's web page for information on recycling and the closest scrap tire facility.

Bring your used tires to your local automotive service station, they may be involved with a tire recycling program or be able to help for a fee
